SUMMARY

Full stack developer with a lifetime in problem-solving, having integrity, serving others before myself, and committed to excellence in everything I do. Very well versed in using these principles in web development to bring out the best of my work for the client's needs and also for team development. Known amongst group members as a person of communication, delegation, and action.

PROJECTS

Weather Dashboard | Repo | Deployed

Search any city and get their current and 5-day forecast using the openweathermap.org open api. Recent searches will be saved in the localStorage.

My Role: Lead and only developer
Tools: html, bootstrap, js, server-side-api

Social API | Repo

Backend database and routing for a social media app for creating a new user, adding friends, sharing thoughts, and reactions.

My Role: Lead and only developer
Tools: NoSQL, MongoDB, mongoose, Insomnia

EDUCATION

Boot Camp Certificate: UC Davis Full Stack Development Course | March 2022

24 weeks of rapid, in-depth and hands-on training of programming skills of front and backend languages. Covers all mentioned technical skills above as well as JQuery, Firebase, and Handlebars.js.

Boot Camp Certificate: Nucamp Boot Camp Course | September 2021

6 months of full stack training covering much of the mentioned technical skills above.
